EDUCATION

B.Tech (AI&DS)	Sri Eshwar College of Engineering	CGPA : 8.2 (upto 5th sem)	2023 -2027
HSC	S D EADEN Matriculation Higher Secondary School	82%	2021-2023
SSLC	Sri Thambusamy Matriculation School	91%	2020-2021

INTERSHIP

MERN Stack Intern | G-Soft Tech Solution - Certificate [Jan-2025]

Developed scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js by integrating RESTful APIs and secure authentication mechanisms. Designed responsive and dynamic user interfaces to improve user experience across multiple devices and screen sizes while optimizing backend services, database operations, and API performance for efficient data handling and faster response times. Gained hands-on experience in frontend-backend integration, CRUD operations, and real-world web application development workflows during the internship.

PROJECTS

AI-Powered Pharmaceutical Tablet Defect Detection System 2026

Tech Stack: EfficientNet, OpenCV, NLP, Streamlit, Python, Deep Learning

Developed an AI-powered pharmaceutical quality inspection system for automated tablet defect detection, confidence-based classification, explainable AI visualization, and NLP-driven quality report generation, enabling reliable real-time quality assurance and streamlined industrial inspection workflows.

Hand Gesture Recognition & Air Writing System 2025

Tech Stack: Python, OpenCV, MediaPipe, Machine Learning, Computer Vision

Engineered a real-time computer vision system for hand gesture recognition and air writing, featuring touchless drawing, gesture-based controls, optimized hand tracking, and low-latency processing to deliver accurate and interactive user experiences.

AI in Career 2024

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, AI, REST APIs

Built an AI-powered career guidance platform that provides personalized college recommendations, multilingual accessibility, scholarship discovery, alumni insights, and profile-based decision support to help students make informed higher education choices.

Email Spam Detection 2023

Tech Stack: Python, NLP, Machine Learning, TF-IDF, Scikit-learn

Developed an intelligent email spam detection system using NLP and machine learning techniques with TF-IDF feature extraction, text preprocessing, and optimized classification models to enable accurate real-time spam filtering through a user-friendly interface.

CERTIFICATIONS

Certified in Affective Computing	NPTEL	2026
Certified in Java Programming	Udemy	2024
Certified in C++ Tutorial	Great Learning	2024
Certified in Data Structure and Algorithms using C & C++	Udemy	2024
Certified in Computer Architecture	NPTEL	2024
Certified in Python Programming	Udemy	2024

ACHIEVEMENTS

- **Leetcode** - Solved 300+ problems | Rank : 341,766 | Contest Rating : 1,414
- **SkillRack** - Solved 600+ problems
- **Creatathon** - Top 5 Performers at SECE

SKILLS

Languages	C C++ Python Java HTML CSS Js
Tech / Frameworks	NodeJS Express ReactJS Tailwindcss
Core	DSA DBMS OOPS MERNStack
Tools	VS Code Canva Github Tableau PowerBI Postman
