PROJECTS

Real Estate Recommendation System: Tech Stack: Python, Pandas, Machine Learning, Flask	2026
Developed a recommendation system to suggest properties based on user preferences and data patterns. Performed data preprocessing and analysis using Pandas and implemented recommendation logic using machine learning techniques. Built a lightweight backend using Flask to serve model predictions. The system assists users in making data-driven real estate decisions.	
Tamil Nadu Disaster Management System: TechStack: React.js, Node.js, Express.js, MongoDB	2025
Built a full-stack web application using React, Node.js, Express, and MongoDB to coordinate disaster response across TamilNadu. Features include user registration, disaster reporting, volunteer management, and admin dashboard. Implemented rolebased access, real-time task assignment, and clean UI with responsive design. The app improves emergency communication and resource allocation by connecting citizens, officials, and volunteers on one platform.	
Blog Application: Tech Stack: React.js, Node.js, Express.js, MongoDB	2024
Developed a responsive blog platform using React.js for the frontend and Node.js with Express.js for the backend. Implemented features such as user authentication, blog creation, editing, deletion, and commenting. Integrated MongoDB for data storage and ensured smooth navigation using React Router. The application provides a clean UI and efficient content management experience for users.
